

## **HS11: Staying Safe with Electricity (RoSPA Approved)**

Electric shock can be, and often is, fatal.

Clearly no employer would wish to expose his employees to such a possibility and this course provides the key basic knowledge necessary to enable employees to avoid electric shock.

Very often accidents at work involving electricity result from a casual attitude arising from familiarity. By requiring employees to undertake this course employers will ensure that they are both reminded of basic safety precautions and acquire up to date knowledge of health and safety best practice.

### **Course Content**

- The types of harm arising from electric shock
- How electrical risks arise
- Controlling electrical risks
- How electrical overheating occurs
- Preventing electrical overheating

### **Course Duration**

- 45 minutes

### **Available in:**

- Audio
- Non-audio

### **Delivered via:**

- Internet
- Intranet
