

HS23: Managing Workplace Transport Health and Safety Risks (RoSPA Approved)

Every year, around 50 people are killed in accidents involving workplace transport, with such accidents also causing more than 1500 major injuries and about 3500 less serious injuries each year.

Accidents involving workplace transport also represent a major cost to businesses; the Health and Safety Executive calculates that a relatively minor accident - for example one which results in a few days off work - is likely to cost an employer around £3500, whilst a major accident can cost around £30,000.

This course will help the learner to manage risks in such a way that accidents involving workplace transport will be much less likely.

Course Content

- The legal risk assessment requirements relating to workplace transport
- The concept of organising for safety
- The importance of raising awareness of workplace transport health and safety risk and safety precautions
- Eliminating or reducing the risks arising from transport hazards by ensuring a safe site, safe vehicles and safe drivers

Course Duration

- 60 minutes

Available in:

- Audio
- Non-audio

Delivered via:

- Internet
- Intranet
