

## **HS07: An Introduction to Managing Health and Safety**

Ensuring the health and safety of employees is one of the prime responsibilities of any organisation. Failing to do so represents a moral, ethical and commercial shortfall that can, and will, have disastrous results for both the organisation and the people who work for it.

The aim of health and safety management, therefore, is to turn uncontrolled hazards into controlled risks. This course will enable the learner to do this by using a cyclical process of problem identification, solution provision and ongoing evaluation.

### **Course Content**

- Why health and safety management is important
- Legal considerations
- The 5-stage framework:
  - Creating a health and safety policy
  - Creating a health and safety culture
  - Risk assessment, reduction and removal
  - Monitoring health and safety performance

### **Course Duration**

- 1 hour 30 minutes

### **Available in:**

- Audio
- Non-Audio

### **Delivered via:**

- Internet
- Intranet
