

HSWG25: An Introduction to Working at Height

The HSE has reported that falling from height remains the most common cause of workplace fatalities, accounting for nearly 3 in 10 fatal injuries to workers.

With this in mind, it's essential that employees have the information necessary to enable them to plan and manage any job tasks they undertake that involve working at height. This course will provide them with, and check their understanding of, that information.

Course Content

The key requirements of The Work at Height Regulations 2005
The control hierarchy for working at height
Safe work procedures and other safety requirements
How work restraint systems and fall arrest systems operate
The legal requirement for head protection
Describes how and when bump caps and hard hats should be worn

Course Duration

- 30 minutes

Available in:

- Audio
- Non-audio

Delivered via:

- Internet
